daisy dreams

the munich band daisy dreams  
doesn't waste time. only a few months after  
forming, they started playing the summer festival  
scene and are in the final stages of recording their  
debut album 'moya moya' (release spring 2023).

their first single 'moon' was released in  
september 2022, 'poolday' came out in november.

'molecules' will be out in february 30th.  
their productivity is no suprise as the five members  
are no strangers to the munich music scene.  
within the first six months they supported the british  
hype band crawlers, played the libertines  
aftershow party and a little tour through bavaria.

their sound is an energetic mix of post punk,  
dream pop and indie rock on a level that speaks  
from the band's broad experience.
